

E-Z Coil™

E-Z Coil™ from Goodyear EP makes installing molded heater hose easier than ever.

By expanding hose applications with less inventory, end users with E-Z Coil on hand don't have to inventory thousands of parts or wait for parts delivery. This saves them time and money while improving customer service. It's just that E-Z.

- Bend straight hose into any molded shape you need with EZ-Coil.
- Takes only seconds to shape using hand pressure only.
- Maintains and holds up to a 90-degree bend and prevents hose from kinking.
- Seven sizes: 1/4", 1/2", 5/16", 5/8", 3/8", 3/4" and 1" can cover more than 26,000 molded hose applications.
- Stainless steel coils provide lifetime service, while strengthening and protecting the hose bend.
- Chosen by Popular Mechanics magazine for the "Editor's Choice Award," beating out thousands of other products on display at the 2005 Automotive Aftermarket Parts Expo (AAPEX).
